Описание объекта:

This authentic finca property offers the perfect retreat amidst picturesque countryside with a natural panorama in an absolute dream location. On a plot of approx. 25,679 sqm, the finca is perfectly embedded in the Mediterranean landscape between S'Alquería Blanca and Cas Concos. Thanks to the hillside location, you can look out over Cas Concos, the Randa mountain and Puig Major, the highest mountain in the Serra de Tramuntana. Directly adjacent is the nature reserve of the Sierra de Levant. The property is of the highest construction quality and is highly functional.

A beautiful driveway leads you to the attractive property. On the first floor of the finca you are welcomed by a spacious entrance area. From here you enter the central living and dining area with fireplace, which is flooded with natural light. Large sliding glass doors allow a seamless transition to the large, approx. 25 m long, angled terrace with 7 sandstone arches. The view and sunsets can be enjoyed particularly impressively from here. From the dining area you have direct access to the fully equipped kitchen. In the right wing of the finca there are 2 spacious double bedrooms, each with an en-suite bathroom and fitted wardrobes.

The staircase in the entrance area first leads to the upper floor in an anteroom with an American kitchen and then to the master bedroom with bathroom en suite. A wrap-around, partially covered balcony surrounds the floor. The staircase leads up another floor to the tower room, which is also used for overnight accommodation.

The inner courtyard leads to the outbuilding, consisting of a further bedroom, laundry room, bathroom and storage room.

The ingrown garden has been lovingly landscaped with Mediterranean plants in a park-like setting. Paved paths lead to orange, mulberry and pomegranate trees. An irrigation system supplies the garden. The sun terrace with pool invites you to relax. The pool measures approx. 5 x 11 m and is up to 2.30 m deep. The future viability and increase in value of the property is ensured by intelligent constructions.

The cool water from the approved deep well can be fed either directly into the pool for cooling or into the 300,000 l underground cistern. All roof areas are also connected to the cistern. There is also a municipal water supply. A solar system, diesel generator and liquid gas tank provide the property with a choice of 3 energy systems. This technology is housed in another separate 24 sqm building. Underfloor heating on the ground and upper floors and 1 further fireplace provide heat throughout the house.

Conclusion: An oasis of well-being for the whole family with plenty of privacy and tranquility!
